

**Tabs3 and PracticeMaster have won numerous awards from the legal community, but our most important recognition comes from our own customers.**

“ *Our firm has been using Tabs3 for 30 years. Since Tabs3 is so complete and easy-to-use, we have never felt the need to switch. It continues to set the standard in legal billing software, and because of this, Tabs3 continues to work well for us today.* ”

**Con Keating (Keating, O’Gara, Davis & Nedved, P.C.)**

“ *It is much easier to get our bills out on time now that we use Tabs3 and PracticeMaster. The straightforward data entry screens make it easy for everyone to enter their time, and we can make the statements look just the way that we want.* ”

**Michael Farnsworth (Weil & Drage)**

“ *Anyone can sell software, but it’s the support that makes the difference in the bottom line. Tabs3 and PracticeMaster have an excellent support staff.* ”

**Riko Bishop (Perry, Guthery, Haase & Gessford, P.C.)**

At Software Technology, Inc., our mission is to provide the most reliable and effective tools for managing solo and mid-sized law practices. Founded in Lincoln, Nebraska in 1979, we installed our first system in November of the same year.

By 1983, relying almost solely on word-of-mouth referrals, we sold over 400 Tabs3 systems. Then we were the first to seek and receive approval from the ABA’s Legal Technology Advisory Council. 1988 saw the introduction of PracticeMaster, practice management software, to help attorneys use computers to manage their firms with more than just basic calendar tools.

All of our company operations still remain in Lincoln, Nebraska, where our dedicated sales staff and a highly trained technical support department provide the best service in the industry. We also offer referrals to a nationwide network of top-notch certified resellers and consultants who provide law firms with sales, installation and troubleshooting assistance.

Throughout the years, both Tabs3 and PracticeMaster products have been recognized with top legal technology awards. Most recently, Tabs3 Billing Software won the Law Technology News Award for Time and Billing System for Small to Mid-Sized Firms for the fifth year in a row.

Now in our 30th year, we have come a long way from that first installation in 1979. While much has changed over the years, several important things remain the same: we are still independently owned; we still exclusively make software to serve the legal industry; and our first client is still using Tabs3 products to this day. In fact, 9 out of 10 users would recommend Tabs3 and PracticeMaster to other attorneys, and our customer service has a 95% satisfaction rating. There are currently over 425,000 user licenses between Tabs3 and PracticeMaster combined on our annual maintenance program, and we’re continually working to add innovative new features and make our products the best choice for law firms, both today and tomorrow.
